I-VALO ARVO LUMINAIRE FAMILY

Manufactured by: I-Valo Oy, Tehtaantie 3b, FIN-14500 IITTALA, FINLAND

I-Valo ARVO luminaires are designed, among other things, for use in the food processing industry, production facilities of hygiene products or packaging materials for the food industry.

- a) **Cover material**
ARVO luminaires are available with impact-resistant cover material, i.e. they can be equipped with a PC cover.
- b) **Falling parts**
ARVO luminaires do not have any parts that could detach and fall into the production process.
- c) **Luminaire structure**
ARVO luminaires come with a smooth surface structure without any cooling fins. The luminaire body is made of robust anodized aluminium profile. ARVO luminaires are IP65 rated, meaning that the luminaires are dust tight and protected from water jets in any direction. This is ideal for keeping the luminaires clean.
- d) **Upgradability**
ARVO luminaires are designed with upgradability in mind. The luminaire technology can be replaced, meaning the entire luminaire does not need to be replaced at the end of its service life. Spare part availability is supported through the use of the latest LED technology designed to fit within the same luminaire frame.
